For example if you do sit-ups every day in a month and increase the number of reps as days pass, not only it doesn't help your body to burn fats and build muscles, but it makes this exercise easy for your body and it loses its effectiveness. If you always get your body in to new challenges and learn more exercises, for sure, your body is going to be fit. In this book we challenge you and your body to new workouts and exercises. All of the body parts, legs, abs, and upper body... have been categorized in their own section and each section consists of steps. Each step is different from each other and is a challenge for you. From step 1 as you go forward you face new exercises and different levels of reps for each exercise which has been divided to 3 Modes: Minimum, Middle, and Maximum. development of cities does not lie only in technology, research and innovation. Sustainable local development also results from a combination of different elements related to the development of social cohesion, the local economy, the environment and culture; also, crucially, it depends on the autonomy of local authorities and the adoption of the most appropriate system of governance. In addition, the urgent need to create better and more liveable cities is now inextricably linked with the integration of environmental principles, in order to prevent the waste of resources and mitigate climate change by restricting CO₂ emissions. Within this framework, new strategies have been implemented for the development of 'New Towns' or satellite cities.
