The AHA guidelines "strongly recommend" that untrained / lay responders perform "compression-only" CPR, sometimes known as CCR. However, medical professionals and trained lay people are still urged to give the victim two "rescue breaths" in between each series of 30 chest compressions. All the changes apply only to adult victims who collapse of cardiac arrest; artificial respiration is still recommended for children and for adults in a few cases, including near-drowning and drug overdose.

CPR & First Aid - AHA Guidelines

Why did the AHA CPR Guidelines Change? In 2010, the American Heart Association (AHA) released their 2010 Guidelines Highlights, which outlines the key changes regarding CPR procedures. The most prominent change was the rearranging of the order from A-B-C to C-A-B in the CPR sequence, emphasizing the chest compressions.. The AHA's research concluded that the old approach creates an unnecessary ...

infants and children (approximately 1.5 inches [4 cm] in infants and 2 inches [5 cm] in children).

Highlights of the - American Heart Association

People should continue to jump in quickly to give CPR, using breaths if they've been trained in CPR and employing mobile technology to speed up the rescue of cardiac arrest victims, according to the American Heart Association's 2015 Guidelines Update for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiovascular Care (ECC).

American Heart Association CPR Guidelines: quick action ...

Description. The 2020 AHA Guidelines Science In-Service is an online course designed to provide healthcare providers information on new science and key changes published in the 2020 AHA Guidelines for CPR and ECC.

2020 AHA Guidelines Science In-Service | AHA

The new guidelines do not have any major changes, but here are some of the basics: No more than 120 compressions per minute with a minimum of 100. Chest compressions for adults should be no more than 2.4 inches and at least 2 inches.
