"Challenging the Myth of Black Inferiority" offers an insightful deconstruction of how we have unconsciously internalised a black inferiority complex stemming from the transatlantic slave trade. Whilst I appreciate that this book was written about African Americans there are many points relevant to myself, a Black British woman.

"Black people are not dark-skinned white people," says advertising visionary Tom Burrell. In fact, they are a lot more. They are survivors of the Middle Passage and centuries of humiliation and deprivation, who have excelled against the odds, constantly making a way out of "no way!" At this point in history, the idea of black inferiority should have had a "Going-Out-of-Business Sale." After all, Barack Obama has reached the Promised Land. Yet, as Brainwashed: Erasing the Myth of Black Inferiority testifies, too much of black America is still wandering in the wilderness. In this powerful examination of "the greatest propaganda campaign of all time"—the masterful marketing of black inferiority —Burrell poses 10 provocative questions that will make black people look in the mirror and ask why, nearly 150 years after the Emancipation Proclamation, so many blacks still think like slaves. Brainwashed is not a reprimand; it is a call to deprogram ourselves of self-defeating attitudes and actions. Racism is not the issue; how we respond to racism is the issue. We must undo negative brainwashing and claim a new state of race-based self-esteem and self-actualization. Provocative and powerful, Brainwashed dares to expose the wounds so that we, at last, can heal.

In this powerful examination of "the greatest propaganda campaign of all time"—the masterful marketing of Black inferiority, aka the BI Complex--Burrell poses ten disturbing questions that will make Black people look in the mirror and ask why, nearly 150 years after the Emancipation Proclamation, so many Blacks still think and act like slaves.

Published in 1839 and edited by abolitionist Theodore Dwight Weld, this work presents hundreds of primary-source accounts of the reality of slavery in the American South.The book's first section collects vivid first-person accounts by former slaves of their lives in slavery. In the second part, Weld offers page after page of stark quotationssome as short as a single sentencefrom various Southern periodicals that illustrate in graphic detail the bondage, floggings, maimings and other horrors endured by slaves. Weld also presents and dissects various pro-slavery arguments. Distributed by the American Anti-Slavery Society, American Slavery As It Is was second only to Uncle Tom's Cabin for its impact on the anti-slavery movement in the United States.

The education system of India has been thoroughly compromised. It is being systematically used to create a historical grand narrative, which is ethically and factually incorrect. Sophisticated propaganda techniques are employed to create this artifice. This book is an effort to highlight this academic fraud. It is a result of research spread over more than 6 years. Facts are the guiding lights for the books and not any ideology. For further information refer to our website: www.brainwashedrepublic.com

Tracing the struggle for freedom and civil rights across two centuries, this anthology comprises speeches by Martin Luther King, Jr., Marcus Garvey, Malcolm X, Barack Obama, and many other influential figures.

A comprehensive, readable analysis of the key issues of the Black Lives Matter movement, this thought-provoking and compelling anthology features essays by some of the nation's most influential and respected criminal justice experts and legal scholars. "Somewhere among the anger, mourning and malice that Policing the Black Man documents lies the pursuit of justice. This powerful book demands our fierce attention." —Toni Morrison Policing the Black Man explores and critiques the many ways the criminal justice system impacts the lives of African American boys and men at every stage of the criminal process, from arrest through sentencing. Essays range from an explication of the historical roots of racism in the criminal justice system to an examination of modern-day police killings of unarmed black men. The contributors discuss and explain racial profiling, the power and discretion of police and prosecutors, the role of implicit bias, the racial impact of police and prosecutorial decisions, the disproportionate imprisonment of black men, the collateral consequences of mass incarceration, and the Supreme Court's failure to provide meaningful remedies for the injustices in the criminal justice system. Policing the Black Man is an enlightening must-read for anyone interested in the critical issues of race and justice in America.

Bringing the worlds of neuroscience and social psychology together, this book examines the ethical problems involved in carrying out the required experiments on humans, the limitations of animal models, and the frightening implications of such research. It also explores the history of thought-control and shows how it exists around us.

Demonstrates how the explanatory power of brain scans in particular and neuroscience more generally has been overestimated, arguing that the overzealous application of brain science has undermined notions of free will and responsibility.
