Concepts in Management Science:
Donald J. Clough ...
Overview. Management science is
concerned with a number of different
areas of study: One is developing and
applying models and concepts that
may prove useful in helping to
illuminate management issues and
solve managerial problems. The

models used can often be represented mathematically, but sometimes computer-based, visual or verbal representations are used as well or instead.

Management science - Wikipedia
Management science encompasses, however, more than just the development of models for specific problems. It makes a substantial contribution in a much broader area: the application of the output from management science models for decision-making at the lower, middle, and top management levels.
