ECLIPSE Simulators - Schlumberger

ECLIPSE is an oil and gas reservoir simulator originally
developed by ECL (Exploration Consultants Limited) and
currently owned, developed, marketed and maintained by SIS
(formerly known as GeoQuest), a division of Schlumberger.
The name ECLIPSE originally was an acronym for "ECL's
Implicit Program for Simulation Engineering".

Reservoir Simulation | Software

Reservoir simulation is an area of reservoir engineering in which computer models are used to predict the flow of fluids (typically, oil, water, and gas) through porous media. Under the model in the broad scientific sense of the word, they understand a real or mentally created structure that reproduces or reflects the object being studied.
