Why is my Salt Water System Not Producing Any Chlorine? Possible

Causes and Solutions ~~Goldline Salt Chlorine Generator Manual~~

Aqua Rite has stopped generating chlorine. A flashing LED indicates a 15-60 second time delay period.

Read Free Goldline Salt Chlorine Generator Manual

CHECK SALT When flashing, the salt level is low (below 2700 ppm) and Aqua Rite is generating at low efficiency. When illuminated steady, the salt level is too low and Aqua Rite has shut down. Page 10 4. Push the Diagnostic button to exit.

a salty taste to your pool (generally, the salt will begin to be tasted at a level of about 3500-4000 ppm).

~~Electronic Chlorine Generator~~

Verify salt level is 2700-3400ppm and check with independent test to ensure accuracy. If salt level is above the range, partially drain pool and/or spa and refill with fresh water to achieve a salt level of 3200ppm. (RULE of THUMB: Each inch of water drained will reduce the salt level 100ppm.) T-Cell 3: 4.15 T Cell 9: 9.50

forms in the pool or spa's water supply. Once the bacteria or algae has been eliminated, the chlorine then changes back into salt.

~~How to Calibrate an Aqua Rite Goldline Salt Generator | Hunker~~

Step 1: Adjusting Salinity (Salt) level.

Before the chlorine generator can be calibrated correctly, the salinity—or salt level in the pool water—will need to be at the correct level. For these systems, it should ideally be between 3200-3600 ppm (parts per million).

This can be tested using a salt test meter or salt test strips.

Rotate the dial to adjust. Note: If the chlorine level does not increase within 24 hours after increasing output, test water with independent tests to determine current salt, stabilizer, phosphate, and nitrate levels. Note: Output is scaled back to 20% of desired output setting at 600 F and output stops at 500 F.
