## ~~EDM Council~~

Enterprise Data Management is the ability of an organization to precisely define, easily integrate and effectively retrieve data for both internal applications and external communication. EDM is focused on the creation of accurate, consistent and transparent content. EDM emphasizes data precision, granularity and meaning and is concerned with how the content is integrated into business applications as well as how it is passed along from one business process to another. EDM arose to address circu

Data management has become a strategic asset in the financial industry. Our philosophy and approach to enterprise data management & master data management (EDM & MDM) is driven by our vision of the central role of trusted data across the enterprise. We firmly believe that managing data as a strategic asset, rather than an operational necessity, will transform business processes and achieve corporate objectives.

## ~~Enterprise Data Management & Master Data Management~~

Master data management is a technology-enabled discipline in which business and Information Technology work together to ensure the uniformity, accuracy, stewardship, semantic consistency and accountability of the enterprise's official shared master data assets.

efficiency. The EDM Council expects the DMM to become an industry standard and suggests it could, in the long term, become a regulatory requirement for firms working in financial markets.

~~EDM Council Promotes Data Management Maturity Model as ...~~  
Enterprise Data Management (EDM) from IHS Markit enables firms to establish best practices across the organization and to create a single source of the truth for key business data used across multiple systems, applications and processes. Harnessing this master source, an organization can then conduct risk analysis and create reports based on reliable, good-quality data.

has issued its Data Management Capability Assessment Model (DCAM), a set of best practices and criteria for measuring such capabilities in the financial services industry. DCAM names eight categories of tasks necessary for data management and 15 objectives firms must pursue concerning a control environment comprised of parameters for it.

## ~~EDM Council Issues Data Management Capability Guidelines ...~~

MDM refers to tools or applications used as part of an enterprise data management strategy to help create master versions of data and provide a consistent view of scattered data. To generalize, data integration is about the movement and consolidation of data and making it accessible, while MDM is about reconciling a business's data from varied sources and making it useable.
