This book represents a new publishing venture in terms of its range of concerns with regard to English in Southeast Asia. The chapters in the volume reflect the interests and themes of the annual Conferences on English in Southeast Asia held since 1996 among participating universities from nine countries: Malaysia, Singapore, Brunei, Philippines, Australia, Hong Kong, Thailand Indonesia and New Zealand. This is believed to be the first time that such diversity and coverage has been published in a single volume. The three sections of the book cover topics which have been consistently discussed at the conferences during the last ten years. The Varieties section features chapters on phonology, dictionary making, syntax, code-switching and the communicative strategies of English speakers from ASEAN countries. The Literacies section focuses on ICT in English language teaching, Information literacy, bilingual and multilingual issues in Southeast Asia, recent developments in English language teaching and education in Thailand and questions of heritage and identity with respect to English in Malaysia. In the Literatures section the concerns are with new generation writings in English in Malaysia, the literature read by young Filipinos, the use of English in Malaysian newspapers in the context of general elections, the discourses of Asian English newspapers in relation to notions like “ globalisation ” and “ global English ” and ASEAN English on Internet websites. As a collection of work by experienced academics engaged in the issues germane to the roles and status of English in Southeast Asia this volume is an excellent resource for university students, university teaching and research staff and university library collections.

A lyrical, epic narrative about Aboriginal knowledge and education.

This book examines Malaysia ' s educational landscape, providing a contemporary study of key themes that have emerged in this multicultural, multi-ethnic society, as it attempts to shift from a middle-income to a high-income nation. Combining contributions by scholars from various fields—such as economics, history, sociology, political science and, of course, education—the book provides richer insights into Malaysia. Offering a unique resource, it will be of particular interest to educators, researchers, students, policymakers and members of the public who want to be updated on the latest trends and challenges in Malaysian education.

Bringing together a wide collection of ideas, reviews, analyses and new research on particulate and structural concepts of matter, *Concepts of Matter in Science Education* informs practice from pre-school through graduate school learning and teaching and aims to inspire progress in science education. The expert contributors offer a range of reviews and critical analyses of related literature and in-depth analysis of specific issues, as well as new research. Among the themes covered are learning progressions for teaching a particle model of matter, the mental models of both students and teachers of the particulate nature of matter, educational technology, chemical reactions and chemical phenomena, chemical structure and bonding, quantum chemistry and the history and philosophy of science relating to the particulate nature of matter. The book will benefit a wide audience including classroom practitioners and student teachers at every educational level, teacher educators and researchers in science education. "If gaining the precise meaning in particulate terms of what is solid, what is liquid, and that air is a gas, were that simple, we would not be confronted with another book which, while suggesting new approaches to teaching these topics, confirms they are still very difficult for students to learn". Peter Fensham, Emeritus Professor Monash University, Adjunct Professor QUT (from the foreword to this book)
