Heating with wood is often considered a natural and economical alternative to electricity or fossil fuels. However, even with a fairly new and efficient woodstove, many cords of wood are required for burning over the course of a single winter, and incomplete combustion can contribute to poor air quality. A rocket mass heater is an earthen masonry heating system which provides clean, safe, and efficient warmth for your home, all while using 70 to 90 percent less fuel than a traditional woodstove. These unique and beautiful installations provide luxurious comfort year round. In cold weather a few hours of clean, hot burning can provide twenty or more hours of steady warmth, while the unit’s large thermal mass acts as a heat sink, cooling your home on sizzling summer days. Packed with hard-to-find information, The Rocket Mass Heater Builder’s Guide includes: Comprehensive design, construction, and installation instructions combined with detailed maintenance and troubleshooting advice Brick-by-brick layouts, diagrams, and architectural plans augmented with detailed parts drawings and photographs for clarity Relevant and up-to-date code information and standards to help you navigate the approval process with local building departments Earthen masonry heating systems are well-suited for natural and conventional builders alike. A super-efficient, wood-burning, rocket mass heater can help you dramatically reduce your energy costs while enhancing the beauty, value, and comfort of your home. Erica Wisner and Ernie Wisner have built over seven hundred super-efficient, clean-burning masonry stoves. They are dedicated to the search for sustainable solutions and the hands-on teaching of creative, ecological, and practical skills.

The fifth volume in Starr’s classic history of California, The Dream Endures shows how Californians rebounded from the Great Depression to emerge in the 1930s into what is now known as "the good life." Starr illustrates the ways the good life prospered in California--in film, fiction, leisure, and architecture. Starr looks at the newly important places where Californians lived out this sunny lifestyle: areas like Los Angeles (where Hollywood lived), Palm Springs (where Hollywood vacationed), San Diego (where the Navy went), the California Institute of Technology in Pasadena (where Einstein changed his view of the universe), and college towns like Berkeley. "In this, more than any other of Starr’s monumental California histories, we see the stirrings of uniqueness in the social and cultural evolution of California. Starr’s theme is relevant to all of America and the national destiny."--Neil Morgan, San Diego Union-Tribune "Enormously sensitive and moving. Social and cultural history doesn’t get any better."--San Francisco Chronicle "In his monumental continuing study of California, Kevin Starr belongs in the company of the best."--Herbert Gold, Los Angeles Times Book Review

Reformer, intellectual, colonial governor, Sir John Bowring (1792 – 1872) was the archetype of the ambitious men who made Britain the leading global power in the 19th century. Born to a modest trading family, he showed an aptitude for languages which led him to literature, then to radical politics in the struggles for liberty in France, Spain and Greece. Taken up by the philosopher Jeremy Bentham, he became a figure in the literary world. But his emphasis was on action rather than theories. He became a high-profile advocate of free trade and a liberal foe of Karl Marx. As member of parliament he supported full suffrage and other radical causes. He modernized Britain ’ s public accounts, invented the florin as a first step to decimalization, and became an industrial entrepreneur. Losing his money in the 1848 slump, he took a job as consul in Canton, which led to the governorship of Hong Kong. As Britain ’ s plenipotentiary in East Asia he negotiated a key treaty with King Mongkut of Siam but also started a war with China. His term as Governor of Hong Kong (1854 – 59) was plagued with problems. But there as elsewhere he left a legacy of liberal ideas. Bowring ’ s impact was spread over so many fields that his name has been eclipsed by those with a narrower focus. This book brings his life and disparate achievements together, with a particular emphasis on his role in promoting free trade and his much criticized career in Asia. " John Bowring (1792 – 1872) was one of the most interesting and influential of Hong Kong ’ s Governors. The career of this polymath exemplified an understanding of the relationship between economic and political freedom. This scholarly and very readable biography, written by one of Asia ’ s most distinguished journalists, shows how free trade became part of Hong Kong ’ s DNA. " —Chris Patten, Governor of Hong Kong, 1992 – 97 " Biographers shun polymaths. As a linguistic genius, free-wheeling entrepreneur, hymnist, colonial governor, Oriental plenipotentiary and the champion of self-determination, freedom of conscience and, above all, free trade, Bowring has had to wait nearly 150 years for a comprehensive but candid account that does justice to his extraordinary range of achievements. That it comes from a kinsman with an equal breadth of vision is an added bonus. " —John Keay, author of China: A History and The Honourable Company: A History of the English East India Company " One hundred and forty years after his death, John Bowring finally has the biography his eventful and enterprising life deserves. From the pages of this fast-paced and well-written biography, Bowring emerges not as the heinous villain who tricked Britain into launching a nasty imperialist war against China in 1858, but as a multifaceted character dedicated to political reform, religious freedom, and above all free trade. Philip Bowring acknowledges that John Bowring was vain, prone to overhasty action, and lacking in judgment, but also that he lived his life by the ideas for which he stood, had an astonishing command of foreign languages, was a dedicated family man, and made an impact throughout East and Southeast Asia which is still felt in many ways today. This is a remarkable book on a remarkable life. " —Hans van de Ven, Professor of Modern Chinese History, Cambridge University
