Trap Making, Step by Step has been written for anyone who wants to begin making their own traps; from the rural householder to the gamekeeper or farmer. Based on well proven traditional designs, this book gives simple step by step instructions which enable anyone with basic carpentry skills to make a range of traps. Each chapter also includes a discussion on Options and Variations so that as the readers confidence grows, designs can be modified and developed with completely new ideas. All of the detailed plans work with light weight wire mesh and wood in sizes that are easy to obtain from any timber yard or builders merchant. Additional support and information is provided on the companion website

Fantastic adventures await for equally amazing characters in this unique game supplement. Combining the concept of evolutionary mutation with the classic adventure styles of the d20 system tabletop role-playing games, this book allows you to create customized characters with supernatural and extraordinary capabilities. Controlling the elements, manipulating raw energy, and performing feats of unimaginable heroism is all at your fingertips, should you be brave enough to venture forth. As your adventurer grows in experience, you can develop new abilities or fine-tune those you have to create a hero that is uniquely your own.

"Contains comprehensive hints on the camp shelter, log huts, bark shanties, woodland beds and bedding, boat and canoe building, and valuable suggestions on trapper's food, etc. With extended chapters on the trapper's art, containing all the "tricks" and valuable bait recipes of the profession; full directions for the use of the steel trap, and for the construction of traps of all kinds; detailed instructions for the capture of all fur-bearing animals; valuable recipes for the curing and tanning of fur skins, etc., etc."

Cat wants a snack. Cat sets a trap. Cat gets...in trouble! Simple sentences and snappy illustrations make this a purr-fect first step into the joy of reading.

To stay competitive in today's market, organizations need to adopt a culture of customer-centric practices that focus on outcomes rather than outputs. Companies that live and die by outputs often fall into the "build trap," cranking out features to meet their schedule rather than the customer's needs. In this book, Melissa Perri explains how laying the foundation for great product management can help companies solve real customer problems while achieving business goals. By understanding how to communicate and collaborate within a company structure, you can create a product culture that benefits both the business and the customer. You'll learn product management principles that can be applied to any organization, big or small. In five parts, this book explores: Why organizations ship features rather than cultivate the value those features represent How to set up a product organization that scales How product strategy connects a company's vision and economic outcomes back to the product activities How to identify and pursue the right opportunities for producing value through an iterative product framework How to build a culture focused on successful outcomes over outputs

In recent years, the field of study variously called local, indigenous or traditional environmental knowledge (TEK) has experienced a crisis brought about by the questioning of some of its basic assumptions. This has included reassessing notions that scientific methods can accurately elicit and describe TEK or that incorporating it into development projects will improve the physical, social or economic well-being of marginalized peoples. The contributors to this volume argue that to accurately and appropriately describe TEK, the historical and political forces that have shaped it, as well as people's day-to-day engagement with the landscape around them must be taken into account. TEK thus emerges, not as an easily translatable tool for development experts, but as a rich and complex element of contemporary lives that should be defined and managed by indigenous and local peoples themselves.

Outsmart the traps that are holding you back from success! Trap Tales is your guide to avoiding the seven obstacles that ensnare people every day. We all fall into traps, and we often don't even realize it until we're deeply entrenched. Like quicksand, traps are easy to step into, but difficult to escape—it seems that the harder we try to climb out, the deeper we sink. But what if there were another way? What if we knew the right strategies to escape the traps we have fallen into? What if we could spot traps from a distance, and avoid them entirely? In this book, authors David M. R. Covey and Stephan M. Mardyks train you in the art of Trapology. You'll meet Alex and Victoria, who have fallen into traps you're sure to recognize. As you read their stories, you'll learn about the seven most common traps in life and work, and how even the smartest and seemingly most accomplished people find themselves stuck and unable to see their way out. Traps are masters of disguise, but there are telltale signs that give them away every time. If you discover that you're trapped right now, consider this book your lifeline—the lessons contained in Trap Tales will teach you how to escape these traps and how to sidestep them in the future. This book, unlike most books, offers counter-intuitive strategies and unconventional wisdom to:

- Learn the seven biggest traps in life and work that catch people unaware
- Identify the traps that are holding you back right now
- Discover your escape route and climb out of the quicksand
- Become a

“Trapologist” and avoid traps altogether The core message of Trap Tales is hope—the belief that anybody can change the trajectory of their life, at any stage of their life. Stop letting traps steal your time, money, energy, and happiness—Trap Tales provides survival training of a different sort, allowing you to write your own tale of success.

This is James Bateman's classic account of the history of animal traps which has become the standard work on the history of animal trapping. Animals of all kinds are covered, including mammals, birds, insects, fish and crustaceans.
