Bundle - Randy Williams - Classic Wing Chun Gung Fu 28 Video Collection The complete Wing Chun Gung-Fu video series was the largest video course on Wing Chun when it was released, and is still one of the biggest and best. It is a classic that should be in everyone's Wing Chun video library.

Drs. Baden, Lee, and Wecht contributed factual material to this novel.

Scholars in many fields increasingly find themselves caught between the academy, with its demands for rigor and objectivity, and direct engagement in social activism. Some advocate on behalf of the communities they study; others incorporate the knowledge and leadership of their informants directly into the process of knowledge production. What ethical, political, and practical tensions arise in the course of such work? In this wide-ranging and multidisciplinary volume, leading scholar-activists map the terrain on which political engagement and academic rigor meet. Contributors: Ruth Wilson Gilmore, Edmund T. Gordon, Davydd Greenwood, Joy James, Peter Nien-chu Kiang, George Lipsitz, Samuel Martínez, Jennifer Bickham Mendez, Dani Nabudere, Jessica Gordon Nembhard, Jemima Pierre, Laura Pulido, Shannon Speed, Shirley Suet-ling Tang, João Vargas

Microsoft PowerPivot is a free add-on to Excel from Microsoft that allows users to produce new kinds of reports and analyses that were simply impossible before, and this book is the first to tackle DAX formulas, the core capability of PowerPivot, from the perspective of the Excel audience. Written by the world's foremost PowerPivot blogger and practitioner, the book's concepts and approach are introduced in a simple, step-by-step manner tailored to the learning style of Excel users everywhere. The techniques presented allow users to produce, in hours or even minutes, results that formerly would have taken entire teams weeks or months to produce. It includes lessons on the difference between calculated columns and measures; how formulas can be reused across reports of completely different shapes; how to merge disjointed sets of data into unified reports; how to make certain columns in a pivot behave as if the pivot were filtered while other columns do not; and how to create time-intelligent calculations in pivot tables such as "Year over Year" and "Moving Averages" whether they use a standard, fiscal, or a complete custom calendar. The "pattern-like" techniques and best practices contained in this book have been developed and refined over two years of onsite training with Excel users around the world, and the key lessons from those seminars costing thousands of dollars per day are now available to within the pages of this easy-to-follow guide. This updated second edition covers new features introduced with Office 2015.

It's not capitalism, it's not neoliberalism - what if it's something worse? In this radical and visionary new book, McKenzie Wark argues that information has empowered a new kind of ruling class. Through the ownership and control of information, this emergent class dominates not only labour but capital as traditionally understood as well. And it's not just tech companies like Amazon and Google. Even Walmart and Nike can now dominate the entire production chain through the ownership of not much more than brands, patents, copyrights, and logistical systems. While techno-utopian apologists still celebrate these innovations as an improvement on capitalism, for workers--and the planet--it's worse. The new ruling class uses the powers of information to route around any obstacle labor and social movements put up. So how do we find a way out? Capital Is Dead offers not only the theoretical tools to analyze this new world, but ways to change it. Drawing on the writings of a surprising range of classic and contemporary theorists, Wark offers an illuminating overview of the contemporary condition and the emerging class forces that control--and contest--it.

In 2020, areas of particular importance for technology trends will include biotechnology, nanotechnology, materials technology, and information technology. This report, the companion document to The Global Technology Revolution 2020, Executive Summary (Silberglitt et al., MS-475-NIC, 2006), assesses in detail a sample of 29 countries with respect to their ability to acquire and implement 16 key technology applications.

Learn the secrets of Shaolin Temple boxing also known as Shaolin Kung Fu with this illustrated martial arts guide. Shaolin Temple boxing is the father of all boxing forms in China and is a close ancestor of Japanese karate. Despite the widespread study of Shaolin kung fu, however, the true origins and history of this exciting martial art have been obscured by wildly fanciful myths and legends that have arisen over the centuries, leading martial-arts authority Robert W. Smith to remark, "there are no good books on Shaolin Temple boxing. There are only varying degrees of poor." In Taiwan, however, Smith had the good fortune to discover a short, anonymous work in Chinese that he believed revealed the essence of Shaolin. This kung fu book is the English version of that text. Abundantly and attractively illustrated, it is a fascinating account of the history of an ancient martial art, as well as a concise martial arts manual explaining the fundamental philosophy and techniques of Shaolin Temple boxing.

"An illustrated manual of wing chun movements and applications in the three hand forms, underscoring the philosophy and theory on which they are based"--Provided by publisher.

One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise - and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, The Hundred-Year Marathon reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders - as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped - sometimes unwittingly and sometimes deliberately - to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. The Hundred-Year Marathon is a wake-up call as we face the greatest national security challenge of the twenty-first century.

This contemporary introduction to the principles and research base of cultural ecology is the ideal textbook for advanced undergraduate and beginning graduate courses that deal with the intersection of humans and the environment in traditional societies. After introducing the basic principles of cultural anthropology, environmental studies, and human biological adaptations to the environment, the book provides a thorough discussion of the history of, and theoretical basis behind, cultural ecology. The bulk of the book outlines the broad economic strategies used by traditional cultures: hunting/gathering, horticulture, pastoralism, and agriculture. Fully explicated with cases, illustrations, and charts on topics as diverse as salmon ceremonies among Northwest Indians, contemporary Maya agriculture, and the sacred groves in southern China, this book gives a global view of these strategies. An important emphasis in this text is on the nature of contemporary ecological issues, how peoples worldwide adapt to them, and what the Western world can learn from their experiences. A perfect text for courses in anthropology, environmental studies, and sociology.
